Contemporary Physics

Editor

Professor P. L. Knight, Optics Section, The Blackett Laboratory, Imperial College, London SW7 2BZ, UK

Book Reviews Editor

Dr R. C. Thompson, Optics Section, The Blackett Laboratory, Imperial College, London SW7 2BZ, UK

North American Editor

Professor T. M. Sanders, Department of Physics, Harrison M. Randall Laboratory, University of Michigan, Ann Arbor, MI 48109-1120, USA

Editorial Board

Professor D. Bailin (Sussex)
Professor E. J. Burge (London)
Professor K. Burnett (Oxford)
Professor R. W. Cahn (Cambridge)
Professor F. Close (RAL, Didcot)
Professor V. L. Ginzburg (Moscow)
Professor M. F. Gunn (Birmingham)
Dr R. Joseph (Honolulu)
Professor P. V. E. McClintock (Lancaster)
Sir John Mason (London)
Dr P. W. Milonni (Los Alamos)
Professor Sir Martin J. Rees (Cambridge)
Professor C. Rubbia (CERN)
Professor Dr H. Walther (Munich)

Volume 39

Volume 39, number 1, January/February 1998

Testing the Standard Model
K. Riles 1

Defects and the dynamics of phase transitions
A. J. Gill. 13

Seeing clearly through the atmosphere
H. Fearn and A. M. Arroyo 49

Classical and quantum noise in electronic systems
G. J. Milburn and H. B. Sun. 67

Essay reviews:
Reflections on the EPR Paradox
S. M. Barnett 81

Book reviews 83

Books received. 93

Volume 39, number 2, March/April 1998

Fingerprinting the Universe—future cosmic microwave background experiments
A. R. Liddle 95

The search for gravitational waves: an experimental physics challenge
F. Ricci. 107

Essay reviews:
Quantum optics
M. Plenio 137

Electron microscopy for beginners
R. Thurstans. 141

Book reviews 145

Books received. 161

Volume 39, number 3, May/June 1998

Fermion molecular dynamics in atomic, molecular, and optical physics
L. Wilets and J. S. Cohen 163

Electroweak baryogenesis
M. E. Shaposhnikov 177

Essay reviews:
Reflections on time
D. T. Pegg 195

Optical fibre sensors
I. Bennion. 199

Book reviews 203

Books received 223

Volume 39, number 4, July/August 1998

Topological defects in the cosmos and lab
T. Vachaspati 225

Phase transitions in the Universe
M. Gleiser 239

Progress in magnetic confinement fusion research
T. N. Todd and C. G. Windsor 255

Water on the Sun: the Sun yields more secrets to spectroscopy
J. Tennyson and O. L. Polyansky 283

Essay review:
Pride and precedence in Victorian science
D. Weaire 295

Book reviews 299

Books received 315

Volume 39, number 5, September/October 1998

M-theory: strings, duality and branes
J. P. Gaunlett 317

Optical lattices—crystalline structures bound by light
D. R. Meacher 329

Atom hosepipes
K. Dholakia 351

Wires of seven atoms—Feynman's very, very small world
R. A. Broglia 371

The history of Newton's apple tree
R. G. Keesing 377

Essay reviews:
Time's quantum arrow revisited
K. Zetie 393

Conflicting views of spiral galaxies
J. J. Binney 397

Book reviews 399

Books received 415

Volume 39, number 6, November/December 1998

Spooky action at a distance in quantum mechanics
L. Hardy 419

Teleportation, entanglement and thermodynamics in the quantum world
M. B. Plenio and V. Vedral 431

Ionic channels in biological membranes—electrostatic analysis of a natural nanotube
B. Eisenberg 447

Ultrasonics of food
M. J. W. Povey 467

Essay reviews
Magnets at work and play
H. Jones 479

Field theorists strike back—stochastic electrodynamics
M. K. Wallis 483

Book reviews 487

Books received 509

Author index 511
